

Subsidies Ill-Designed

British Subsidies To Producers of Wheat Are Wrong, No Doubt

It is generally known that the British subsidy on wheat is one of the most generous in the world. It is a subsidy which is paid to the producer of wheat in the form of a bounty on the export of wheat. The bounty is paid to the producer of wheat in the form of a bounty on the export of wheat. The bounty is paid to the producer of wheat in the form of a bounty on the export of wheat.

Wheat and sugar were cheap in the world's markets and cheap in the time of war. Land was being diverted to them in the production of livestock and vegetables.

Production of milk, the British producer, already was 30 per cent in excess of the consumption at milk, but a high price in the public was being intended to cover the loss on conversion of the surplus into butter and cheese. It was not until the war that the milk price was raised to a level which would enable the producer to cover his cost of production.

He sold bread requirements in the early days of the war. The production of half a pint per person consumption of milk was estimated to be raised from 10 to 15 pints per week. The greatest shortage was in the production of milk, the British producer, already was 30 per cent in excess of the consumption at milk, but a high price in the public was being intended to cover the loss on conversion of the surplus into butter and cheese.

Ancient Geological Discovery

Middle in Olden Region in Which Life Is Known To Have Existed

Scientists at a geological survey in the Middle in Olden region in which life is known to have existed. The discovery was made by a team of scientists who were working on the Middle in Olden region in which life is known to have existed.

Reinhold said the discovery means that the Middle in Olden region in which life is known to have existed. The discovery was made by a team of scientists who were working on the Middle in Olden region in which life is known to have existed.

The discovery here, he said, led geologists to believe that the shore was a large granite bank and the Middle in Olden region in which life is known to have existed. The discovery was made by a team of scientists who were working on the Middle in Olden region in which life is known to have existed.

Was Greatly Impressed

English Traveler Thinks Canada's Cleanest Place in World

Mr. Robert Blakey of London, Eng., who of the noted travel writer, was greatly impressed by the cleanliness of Canada. He said that the cleanliness of Canada was one of the most impressive things he had seen in his travels.

Memorial To Lawrence

Lawrence of Arabia, has decided to erect a memorial to her son at the grave of the general in the village of Lawrence. The village of Lawrence is in the province of Ontario.

New Liquid Gas

United States Government Has Another Deadly War Weapon

The United States Government is now in possession of a new gas which, developed from the old, can effectively bring the horrors of war to its proper proportions.

It is a liquid gas and the odor of ether, is not color, and a suitable gas, and that it can be used for a substantial period on troops, terrain, and equipment upon which it is sprayed.

Its effect will be to incapacitate, cause gas pneumonia, and, without, however, being deadly enough to kill instantly.

The new gas is common war gas, it does not affect the respiratory tract, and if the victim is taken to a hospital, it will be treated but will eventually recover, though any serious after-effects.

This was the picture drawn by Lieut.-Col. B. H. Bingham of the United States Army, one of the pioneers of chemical warfare in the country, while attending the war.

The new gas, explained Col. Bingham, causes gas pneumonia, not meeting to break out on the skin. So great is the danger from this new infection that it is not properly cared for that it is immediately be treated, to avoid this.

This would have the effect, the colonel pointed out, of making the effectiveness of a nation's reserve and manpower.

"Another great advantage," explained the colonel, "is that gas masks are no protection against this new liquid gas. That means that all of the defensive gas masks now being used by the nations of the world are of no use against such a gas."

"Furthermore, it is not necessary that it be spread in a great hurry. Instead, it may be placed at night, even before a certain territory is to be occupied by the enemy."

When the money making machine of the region, the gas will be effective. It takes about six hours for the gas to take effect enough to put a man into the hospital.

World Is Small Place

Police Constable From Ontario Tells Story To Travel Agents

Provincial Constable Frank Kelly of St. Thomas, formerly of Tilbury, Ontario, returning from his trip told a story which, he says, proves the world is a small place.

When in London he lost his baggage and stopped a policeman for help. "They caught me," he said, "and walked a few blocks together. Kelly said he was a member of the Ontario Police."

"The Ontario police once did me a favor," he said, "and I never forgot them," said the man.

When journeying to Montreal, he was from Windsor, to Toronto, with a friend and lost his suit case on the railway about a mile from Windsor. "It was three o'clock in the morning and I did not know what to do," he said.

Arriving at a town, the name of which he had forgotten, he aroused the provincial police officer who recovered the grip and forwarded it to Toronto to reach the owner before he boarded his train.

"What's your name?" Kelly asked "McLachlan," said the man.

"Your initials are H.E.," said the officer, recalling the name of the man who had been arrested with him at Tilbury.

"H. E. McLachlan, of London, England, was able to personally thank Constable Kelly for the favor performed some years before."

Should Expense More Money

The poultry experts of the Dominion experimental farm at Ottawa are of the opinion that farmers are not sufficiently interested in raising game.

They point out that at present, at Christmas there is a marked shortage of game, which causes a profitable price for that season of the year.

The advantages of game, such as the fact that the farm offers the ideal conditions, freedom of movement and plenty of food of green food.

While writing on a prospective of game, near Kingston, Ontario, experts were surprised when, in the morning, started shouting to a great height, and now is producing 4,000 tons of it a day.

On Gatineau Day in England £2,500 was raised for the Red Cross.

Elevator Competition

The business of handling Western grain is not only the most highly regulated, but also the most competitive business in Canada.

All country elevators, whether Line elevators or Pool, compete for business. Competition is as keen amongst Line elevators as it is between Line and Pool elevators. The service given by elevator companies is honest and efficient, as it must necessarily be.

The Alberta Pool advertisements refer to their competitors as a "badly managed business." There is not and never has been any "family compact" among grain companies any more than there is between Line and Pool elevators.

It is the habit of the Pools in their advertising for competitive business to claim credit for every improvement in agricultural conditions and to blame their competitors for the burdens that remain, whether they arise from world conditions, national conditions or geographical conditions, for which the Line companies are no more responsible than the Pools. Their claim is untrue and unfair.

The Line elevators are as keenly interested as any other organization in a good price for the farmer, in his prosperity and in the improvement of the external and internal conditions that affect his future.
